

Supporting Workers' Comp Patients

Data Powered Recovery

Recupe helps injured workers follow their care program at home, including the treating physician's instructions and home exercises.

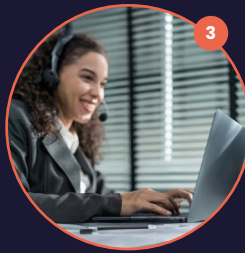

The Recupe program includes a patient app, easy-to-wear sensor, empathetic coach, and insightful bio-psycho-social analytics. Recupe is approved and paid for by the payer and is available in English and Spanish.

Why Work with Recupe:

Data-Driven Insights: We partner with you to provide actionable insights on patient recovery at home, alerting for quicker intervention and supporting your goal of delivering a quality patient experience.

Dedicated Coaches: Leverage psycho-social data to engage patients daily to follow their care plans between clinic visits.

Enhanced Patient Engagement: Program empowers patient recovery and drives accountability.

Effective Communication: Our dedicated coaches ease anxiety and ensure compliance while encouraging patients to attend their clinic and PT appointments.
